## Description

The Laski 460 Hybrid is a compact, professional-grade stump grinder that delivers powerful performance with hybrid flexibility. Designed for contractors, arborists, and municipal operators, it features a petrol-powered engine combined with an electric drive system—allowing quiet, low-emission operation in noise-sensitive or enclosed environments.

Built for precision stump removal, the 460 Hybrid is equipped with a rugged cutting wheel, durable carbide teeth, and intuitive operator controls. Its balanced design and manoeuvrability make it ideal for residential, urban, and hard-to-reach sites.

### Key Features:

Hybrid drive system: petrol engine for cutting power, electric motor for drive

Low-noise electric travel for work in residential or restricted-access areas

High-performance cutting wheel with replaceable tungsten carbide teeth

Compact and narrow frame for access through gates and tight spaces

User-friendly control panel with safety interlocks and adjustable handles

Durable chassis and components built for commercial use

Foldable handle and transport wheels for easy handling and mobility

Low-maintenance design with accessible service points

## Applications:

Urban and residential stump removal with reduced noise and emissions

Tree care and landscaping in parks, cemeteries, schools, and hospitals

Municipal grounds maintenance and street tree management

Access-restricted or environmentally sensitive work zones

Contractors requiring compact, transportable grinding solutions

The Laski 460 Hybrid combines professional stump grinding performance with modern hybrid efficiency. Ideal for noise-sensitive and confined sites, it offers the versatility, reliability, and cutting precision professionals demand—without compromising on power or portability.
