Description

The McConnel Robocut T500 is a next-generation remote-controlled slope mower, purpose-built for tackling the most demanding terrains with power, safety, and precision. Designed to operate on steep inclines up to 55°, the T500 allows operators to work efficiently in hazardous or hard-to-reach areas – all from a safe distance.

With a high-performance 50hp engine, advanced all-terrain track system, and intuitive long-range remote control, the Robocut T500 is ideal for applications in vegetation management, highways, railways, utilities, and forestry.

Key Features:

50hp engine with low emissions and high torque

Remote control range up to 150m for safe, efficient operation

Advanced track system for superior stability on slopes

Low ground pressure for minimal environmental impact

Compatible with a wide range of front-mounted attachments

Built for continuous operation in harsh, uneven terrain

Quick-attach system for fast and easy tool changes

Compact, robust, and incredibly capable, the Robocut T500 is trusted by professionals worldwide for its ability to deliver high-performance cutting in the most challenging environments—without compromising operator safety.
