Take a look at our establishment system

Proving to be the most reliable establishment method, the Mzuri system produces perfect seed to soil contact. With better establishment, direct into residue, soil structure and organic matter is improved to support vigorous root growth – **all resulting in a significant and consistent uplift in yield.**

ESTABLISHMENT SYSTEM SAVINGS*

on average **£107/ha**

SEED BED FERTILISER SAVINGS*

£36/ha with band placement

LABOUR SAVINGS*

on average **81mins/ha**

BOOK YOUR DEMO TODAY

* Based on Mzuri 2019 customer survey of users converting from conventional plough based systems.

Every year McHale balers produce over 75 million bales of forage for farmers and contractors. To maximise the feed value of this forage it is important that grass crops are cut when the sugar content is highest, and that the mower leaves clean crop stubble and produces quality forage free from impurities.

LARGE MID SEASON SAVINGS
